

The Most Coveted

30/45 days Intense Summer Training Program in
Embedded Technologies

Linux Systems - Embedded C - Micro controllers

Modules:

- Linux basics and usage
- Embedded C Programming
- Embedded Programming on Micro controllers

Program Details:

- ◆ **How to build automation solutions?**
- ◆ **Hands-on approach with 80% of the contents executed over the custom built hardware**
- ◆ **The training will be handled by domain experts, who have experience of building real time systems.**
- ◆ **At the end of the workshop, students will be able to get a very good grasp of programming the real hardware. They also will be equipped to develop multiple projects using any micro controllers.**

Advantages / Salient Features:

- **Complete Training by Developers from Industries**
- **Work shop based training**
- **Project**
- **UNDERSTAND how Industry works?**
- **Highly affordable cost / Accommodation provided**

Objectives:

In this one month summer training camp, the students will go through intense workshop based training in Popular technologies in the Embedded Industry and work on areas to make their understanding strong in these Domains and know how the Industry works and what their approach is?

Moreover, the student will have an Independent stand and more clarity to choose what "Career Path" they should take in future within Embedded Domains.

How to Apply?

Register On-line at <http://www.emertxe.com/registration.php> Kindly add tag "**Summer Training - College Name**" with your name in the Registration Form

For Confirmation:

Kindly make an Online Payment in our State Bank of India account (Details below) or DD on behalf of "Emertxe Information Technologies (P) Ltd", Payable at Bangalore

Bank Details for Online/Direct Transfer:

Bank name: State Bank of India
Branch: Jayamahal Extension
Account Number: 10378321544
Account name: Emertxe Information Technologies (P) Ltd.
IFSC code: SBIN0001731
